TSI currently provides technical support that facilitates the planning and implementation of life-cycle cost and supportability strategies. We perform total system analyses of cost-reduction initiatives to include: Sustainment Cost Management Annex (SCMA) initiatives, system total ownership cost-reduction initiatives, supportability strategy validation, and business case evaluations of performance-based system support efforts. Results of the analyses are provided to the Government with any associated benefits and/or risks.

TSI's strategic support strategy approach helps customers define best-value approaches to total system life-cycle management.

- Performance-based logistics
- Business case analysis
- Programmatic, engineering, and technical support
- System sustainment and life-cycle product support
- Master integrated supportability schedule
- Reliability, Availability, and Maintainability (RAM)
- Integrated logistics support
- Integrated supply chain management
- Life-cycle cost and supportability strategies
- Consistency with other programs
- Integrated Product Team meetings and conferences
